Problem:

Problem of keeping track of assignments.

Problem: hard to find club meeting times/details

Problem: hard to coordinate schedules for meetings/group work

Requirements:

iOS/Android (mobile)

Can use internet but should also be functional without connection

easy and simple to use for anyone

Add accessibility features for disabled students

Paying for/keeping app available:

Collaborate with USC to have them help us promote the app

Ads to keep the app running or pay for no ads, pays for upload fees and advertising

Would USC be willing to pay for student access to the app?

Functionality:

provides notifications x minutes before each event/ task scheduled

Categories for events

Notification Banner Layout

Description for Events

needs to include scheduling for things outside of just classes (university related)

Support section to get feedback for any issues

Connected to websites with homework deadlines (Blackboard, Pearson, CSCE websites)

Be able to schedule appointments for office hours/tutoring.

Have notifications for events that user may be interested in.

Colors for different categories

Function to find shared free times

Nice to have features:

Feature to share selected parts of schedule with others (friends or parents)?

Can set reminders for self care (like exercising or getting to bed on time)

Import events from general university calendar

Have shared calendars (within colleges or departments?)
